

# APOLLO

## *Kentucky Bluegrass*

***Top disease resistant Kentucky bluegrass on the market today. Elite Cultivar, Top NTEP Turf Quality Performer, deep green/fine texture, excellent low mow, drought tolerant, top resistance to summer patch disease, and powdery mildew. Excellent performer under different management levels.***

### (AMERICA TYPE)

**Uses:** A best choice for over seeding and new construction of high quality turf including bluegrass fairways. APOLLO also can be used as a dense, attractive first cut rough to contrast Bentgrass fairways. This is an excellent choice for over seeding of high maintenance Bluegrass athletic fields. When used in a program of efficient fertility and managed soil P.H., it will spread and withstand cleat wear, traffic and mechanical damage. As an "America type", APOLLO can facilitate genetic breadth in bluegrass blends by using 3 or 4 "types" as grouped by Rutgers University in yearly updated categories.

**Geographical Adaptation:** APOLLO will thrive throughout the range of Kentucky bluegrasses adaptation. It has adaptability in the upper transition zone under appropriate management. Can be mixed with turf type tall fescue at the rate of 5–20% for increased sod strength and wear tolerance.

**Production Areas:** Washington, Oregon, Idaho

**Features:** APOLLO features density, ability to withstand 1/2" cut, and offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality obtainable.

MD/VA RECOMMENDED CULTIVAR.

**Rate:** Overseeding: 2–3 lbs./1,000 Sq. Ft.  
New Seeding: 2.5–3.5 lbs./1,000 Sq. Ft.
