

# GREENKEEPER- WAF

(Experimental designation: K01-WAF)

## *Turf Type Tall Fescue*

**Uses:** NEW RELEASE from Scotts/Landmark Seed with initial significant commercial harvest in 2004.

GREENKEEPER-WAF is an excellent choice for sports fields, golf course roughs, commercial turf, home lawns, erosion control, roadsides and airports. This is the most popular turf in the transition zone, and in other areas that require a durable turf.

GREENKEEPER-WAF Tall Fescue is a good choice for athletic fields throughout the transition zone as well as in sandy, un-irrigated situations in the Southern half of the cool season zone where conditions are poor for standard Kentucky bluegrass and Perennial Ryegrass. Use in full sun to moderate shade.

**Geographical Adaptation:** All areas of adaptation for Turf Type tall fescue with excellent performance compared to other commercial varieties in the hot and humid Southern, Mid-Atlantic and Transition Zone.

**Features:** GREENKEEPER-WAF tied for #1 in Turfgrass Quality performance in recent data (2002 NTEP. GREEN-KEEPER-WAF rated #1 in the Transition Zone tests, and is included in the top statistical performance group in the Southern and Mid-Atlantic test data including College Park, MD, Blacksburg, VA and Raleigh, NC. GREENKEEPER-WAF has a fine texture, excellent summer density, seedling vigor, % living ground cover (summer), brown patch resistance, and wear tolerance as reported by the 2002 NTEP tests found at [www.ntep.org](http://www.ntep.org).

**Production Areas:** Washington, Oregon

**Rate:** Overseeding : 3–6 lbs/1,000 Sq. Ft.  
New Seeding: 8–10 lbs/1,000 Sq. Ft.
