

COYOTE

Turf Type Tall Fescue

Uses: COYOTE Tall Fescue is an excellent choice for sports fields, golf course roughs, commercial turf, home lawns, erosion control, roadsides and airports. This is the most popular turf in the transition zone, and in other areas that require a durable turf. COYOTE Tall Fescue is a good choice for athletic fields in sandy, un-irrigated situations in the Southern half of the cool season zone where conditions are poor for Kentucky bluegrass and Perennial Ryegrass. Use in full sun to moderate shade.

Geographical Adaptation: Transition zone North to Southern half of cool season zone.

Features: Heat and drought tolerant species. COYOTE is the most consistently high rated turf type tall fescue variety with performance longevity over the previous two NTEP tests. Dark green color, excellent texture and density. Very good performance in NTEP trials for brown patch disease resistance. Excellent heat and drought tolerance, moderate shade tolerance and excellent durability are characteristics that make COYOTE Tall Fescue an excellent and versatile grassing choice.

MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon

Rate: Overseeding: 3–6 lbs/1,000 Sq. Ft
New Seeding: 8–10 lbs/1,000 Sq. Ft
