

# DIVINE

## *Perennial Ryegrass*

**Uses:** The uses top performing DIVINE Perennial Ryegrass are endless due to the speed of establishment and the dark green, low growing qualities. In southern areas, perennial ryegrass is the standard for over seeding warm season turf for cool season turf performance. DIVINE will do an excellent job in either new construction or overseeding, especially when compared to mixes using common or lower performing types. Contractors, municipalities and turf managers can receive excellent performance at a good value with Divine.

**Geographical Adaptation:** From the northern portion of the transition zone, north throughout the cool season turfgrass zone. Perennial ryegrass is equally at home over seeded into Bermudagrass for beautiful winter turf in southern climates.

**Features:** DIVINE achieved the top performance group rating of all perennial ryegrasses for fairway turf quality in the most recent turf trials. Low growing, dense and dark green. Excellent grey leaf spot performance data continues to support the inclusion of DIVINE in high quality turfgrass blends. Unlike older varieties, DIVINE's growth is focused on lateral rather than upright thereby reducing mowing and more closely matching the growth habit of Kentucky bluegrass.

MD/VA RECOMMENDED CULTIVAR.

**Production Areas:** Washington, Oregon

**Rate:** Overseeding: 2–14 lbs/1,000 Sq. Ft  
New Seeding: 4–7 lbs/1,000 Sq. Ft
