

ENVICTA

Kentucky Bluegrass

Consistent performer, dark green color, stronger-wider blades, clean mowing characteristics, widely adaptable, one of best "BVMG Type" under low mowing.

(BVMG TYPE)

Uses: A valuable choice for over seeding and new construction of premium Bluegrass with moderate cost. ENVICTA can be used as a dense, attractive first cut rough component to contrast Bentgrass fairways. This is an excellent choice for over seeding of moderate to high maintenance bluegrass athletic fields, commercial landscapes, lawns and golf course roughs. When used in a program of optimum fertility and managed soil P.H., it will spread and withstand cleat wear, traffic and mechanical damage. As a "BVMG type", ENVICTA can facilitate genetic breadth in bluegrass blends by using 3 or 4 "types" as grouped by Rutgers University in yearly updated categories.

Geographical Adaptation: ENVICTA will thrive throughout the range of Kentucky bluegrasses adaptation. It has adaptability in the Northern quarter of the transition zone under appropriate management.

Features: ENVICTA features density, and offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality obtainable.

MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon, Idaho

Rate: Overseeding: 2–3 lbs./1,000 Sq. Ft.
New Seeding: 2.5–3.5 lbs./1,000 Sq. Ft.
