

MIDNIGHT

Kentucky Bluegrass

The variety to which all others are compared. Dark green genetic color, top performance for 20 years! MIDNIGHT's excellent history shows it tolerates lower mowing heights. The most consistent, trial leading Kentucky bluegrass cultivar for overall turf quality.

(MIDNIGHT TYPE)

Uses: A best choice for over seeding and new construction of Bluegrass fairways. MIDNIGHT also can be used as a dense, attractive first cut rough to contrast Bentgrass fairways. This is an excellent choice for over seeding of high maintenance Bluegrass athletic fields. When used in a program of high fertility and managed soil P.H., it will spread and withstand cleat wear, traffic and mechanical damage. As a "Midnight type", MIDNIGHT can facilitate genetic breadth in bluegrass blends by using 3 or 4 "types" as grouped by Rutgers University in yearly updated categories.

Geographical Adaptation: MIDNIGHT will thrive throughout the range of Kentucky bluegrasses adaptation. Due to its strong genetic breadth it has adaptability in the Northern quarter of the transition zone under appropriate management.

Features: MIDNIGHT features density, ability to withstand 1/2" cut, and offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality obtainable.

MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon, Idaho

Rate: Overseeding: 2–3 lbs./1,000 Sq. Ft.
New Seeding: 2.5–3.5 lbs./1,000 Sq. Ft.
