

INSPIRE

Perennial Bluegrass

Uses: The uses of top performing INSPIRE Perennial Ryegrass are endless due to the speed of establishment and the dark green, low growing qualities. In southern areas, perennial ryegrass is the standard for over seeding during the winter months. INSPIRE will do an excellent job in either new construction or overseeding, especially when compared to mixes using common or lower performing types. Contractors and municipalities and turf managers can receive excellent performance at a good value.

Geographical Adaptation: From the northern portion of the transition zone, north throughout the cool season turfgrass zone. Perennial ryegrass is equally at home over seeded into Bermuda for beautiful winter turf in southern climates.

Features: INSPIRE achieved the second highest rating of all perennial ryegrasses for fairway turf quality in the most recent turf trials and was rated best for grey leaf-spot resistance in the 2000 data. Low growing, dense and dark green. Unlike older varieties, INSPIRE's growth is focused on lateral rather than upright thereby reducing mowing and more closely matching the growth habit of Kentucky bluegrass.

MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon

Rate: Overseeding: 2–14 lbs/1,000 Sq. Ft
New Seeding: 4–7 lbs/1,000 Sq. Ft
