

# PENTIUM

## *Perennial Ryegrass*

**Uses:** The uses of top performing PENTIUM Perennial Ryegrass are endless due to the speed of establishment and the dark green, low growing qualities. In southern areas, perennial ryegrass is the standard for over seeding during the winter months. Inspire will do an excellent job in either new construction or overseeding, especially when compared to mixes using common or lower performing types. Contractors and municipalities and turf managers can receive excellent performance at a good value.

**Geographical Adaptation:** From the northern portion of the transition zone, north throughout the cool season turfgrass zone. Perennial ryegrass is equally at home over seeded into Bermuda for beautiful winter turf in southern climates.

**Features:** PENTIUM Perennial Ryegrass (NJ 6401) received top performance group rating in 2001 NTEP. Finer texture, fast establishment, excellent traffic tolerance, excellent leaf spot, dollar spot, and crown rust resistance. Great winter color and early spring green-up.

MD/VA RECOMMENDED CULTIVAR.

**Production Areas:** Washington, Oregon

**Rate:** Overseeding: 2 – 14 lbs/1,000 Sq. Ft.  
New Seeding: 4 – 7 lbs/1,000 Sq. Ft.
