

SEABREEZE

Slender Creeping Red Fescue

Uses: SEABREEZE is adapted for use in high quality sun and shade mixes and high salinity soils. Its fine texture and vigorous growth; make it an excellent component to most fine fescue mixes especially in soils where salt content impedes the performance of other varieties. Not recommended in situations calling for a high degree of wear tolerance.

Geographical Adaptation: Best from the northern third of the transition zone and north in coastal turfgrass mixes. Can be utilized in many northern areas of the prairie, the Intermountain States as well as the Pacific Coast states.

Features: SEABREEZE has salt tolerance and shade tolerance; fine texture, good for blending, excellent overall turf quality.

Production Areas: Washington, Oregon

Rate: Overseeding 3–5 lbs./1,000 Sq. Ft.
New Seeding 4–5 lbs./1,000 Sq. Ft.
