

P-105

Kentucky Bluegrass

Medium Dark Green "Elite" variety for Golf, Sod and other fine turf. Dense, compact growth habit. Medium texture. Excellent wear tolerance make P105 a favorite of sports turf managers, golf course superintendents and sod producers. Tolerates lower mowing heights.

(COMPACT TYPE)

Uses: An "Elite"-choice for sod production, over seeding and new construction of PREMIUM Bluegrass turf. P-105 can be used as a dense, attractive first cut rough component to contrast Bentgrass fairways. This is an excellent choice for over seeding of moderate to high maintenance bluegrass athletic fields, commercial landscapes, lawns and golf course roughs. When used in a program of optimum fertility and managed soil P.H., it will spread and withstand cleat wear, traffic and mechanical damage. As a "Compact type", P-105 can facilitate genetic breadth in bluegrass blends by using 3 or 4 "types" as grouped by Rutgers University in yearly updated categories.

Geographical Adaptation: P-105 will thrive throughout the range of Kentucky bluegrasses adaptation. It has adaptability in the Northern quarter of the transition zone under appropriate management.

Features: P-105 features very wear tolerant, dense, compact growth that offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality- most wear tolerant turf available. Suitable for "low-mow" applications.

MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon, Idaho

Rate: Overseeding: 2–3 lbs./1,000 Sq. Ft.
New Seeding: 2.5–3.5 lbs./1,000 Sq. Ft.
